

### ***Product Description: Closed Top Flowback Tank***

Well Testing offers closed top flowback tanks equipped with either a positive or adjustable choke. Flowback tanks are also equipped with a gas diffuser. The flowback tank allows the operator to turn well flow into the tank for CO<sub>2</sub>, energized fluids, and acid. This innovative technique minimizes sand cutting and freezing. This tank allows for the retention and measurement of well stream liquids during flowback.

### **Closed Top Flowback Tank Specifications:**

Working Pressure:	Atmospheric
Capacity:	500 Barrels
Choke:	Adjustable or Positive
Gas Diffuser:	6' x 10"
Dimensions:	45' x 8.5' x 9.5'
